## Personal Profile

---

I am a junior with open-minded and result-oriented mindset. I am willing to study and improve myself. While my short-term aim is having a Supply Chain Internship, the long-term one is becoming a Management Trainee in 2025. Despite nothing in experience working at supply chain, I used to study some relevant SCM course and participate in numerous contest which is enough to understand the Supply Chain fundamentals and work at Internship job.
